

Kia Picanto

Overseas model shown.

Life is what you make it

At Kia, we believe movement inspires ideas. Great ideas come to you when you're on the move. Whether you're walking, traveling on a train or driving.

It's why we create the spaces and the time you need to bring ideas to life. Very like the experience that awaits you behind the wheel of every Kia. With our design, space innovation, purpose driven technology and built in sustainability, we aim to inspire everytime you encounter the Kia brand.

Because you never know where your next big idea awaits. But they are out there. Waiting to be discovered. So, what are you waiting for? Get moving. Get inspired.

Movement that inspires

Your city soul mate

The Picanto may be Kia's smallest car, but it's big on personality. It's also full of big ideas for putting more fun into city driving. Whether it's making easy work of your commute or zipping around town on the weekend, Picanto adds a smile to every journey.

With its positive, responsive steering, the Picanto is agile and easy to handle. A comprehensive line-up of safety features protects you in every situation. The powertrain delivers power smoothly right through the revs, and all models in the line-up are more fuel efficient than their predecessors. The latest tech keeps you entertained and connected during your journey.

Overseas models shown.

Looking fun, looking sharp

The Picanto X Line features a distinctive look, the ever-stylish and more muscular X Line sports the eye-catching new Kia logo.

The distinctive wide tiger-nose grill and large air-intake speak to real personality. Another feature to note, the large windows that let in lots of light and provide excellent visibility.

The X Line has a wide tiger nose grill that houses a signature black trim that distinguishes this model. The bumper has a metal effect recess into which is etched the X Line logo. Black trim highlights on the doors and at the rear add a sense of robustness and purpose, as does the 15mm higher stance.

Overseas models shown.

Driving city style

Narrow streets, tight turns, short gaps in the traffic - the Picanto navigates the city with ease.

Quick, enjoyable handling responses, combined with high ride stability, take most of the hassles out of city driving. The positive steering rack adds to the car's agility, useful when negotiating heavy traffic.

Powered by a sprightly 1.2 litre DOHC engine, the Picanto is peppy when required. That said, it's well-mannered and

Overseas models shown.

quiet at slower speeds, thanks to transmission shift points that have been optimised for city driving. Improvements in fuel efficiency, resulting from a change to the fuel injection system, are welcome when you're caught in traffic. X Line owners will enjoy the smooth-shifting automatic.

When you put your Picanto into cruise control on the open road, there's no fuss, no bother, just kilometres of relaxed, effortless, enjoyable driving

The inside story

The Picanto has a distinctive urban edge, seen to best advantage in the cabin design. The composite leather is offset with grey trim, a theme reiterated in the highlights in the door panels, on the dashboard and around the gear selector, where black, black gloss and silver feature strongly.

Versatility is another strong feature of the vehicle. 60:40 split rear folding seats allow several combinations of passengers and cargo, while the dual-level luggage board maximises your cargo capacity, be that for a big shop or a weekend away with lots of luggage.

Overseas models shown.

There is generous leg and shoulder room for drivers and passengers alike, and seats are more than accommodating. Further comfort is provided by the one-touch climate control. A double-tray cubby just below the temperature controls adds storage space, while the dual cup holders keep drinks secure and close at hand.

For all the focus on comfort, Picanto hasn't forgotten safety. The cabin features six airbags, with front-side and side-curtain airbags providing extra protection for passengers. ISOFIX child seat anchors also give you peace of mind, by keeping those little ones well secured in the back.

Your safety comes first

The Picanto incorporates several of Kia’s most advanced driver assists, making it one of the safest vehicles in the small car segment.

All vehicles in the line-up feature Electronic Stability Control (ESC) and Autonomous Emergency Braking (AEB), which applies the brakes automatically if the vehicle detects an imminent collision with another vehicle or a pedestrian in front of the car. These are supported by a full range of braking and cornering assists, including Vehicle Stability Management (VSM), Torque Vectoring by Braking, Cornering Brake Control (CBC) and Straight-Line Stability (SLS).

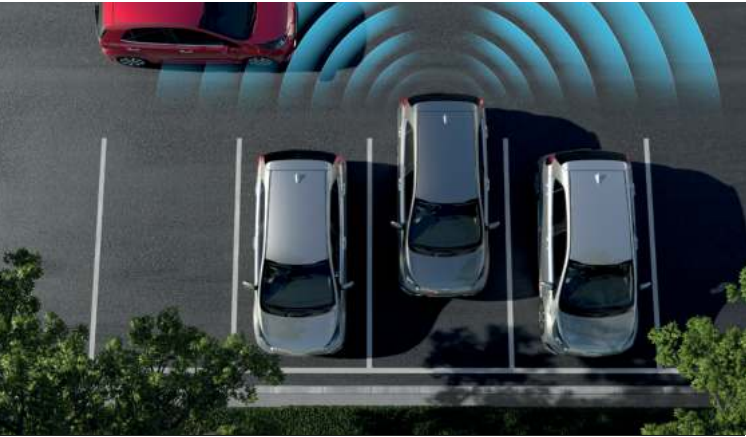

Rear Cross Traffic Collision Avoidance Assist (RCCA) is available on X Line. This alerts the driver and stops the car if it detects another vehicle approaching when you reverse out of a parking space. When reversing you also have rear parking sensors to let you know how far you are from vehicles or objects behind you, along with the rear-view camera with dynamic guidelines that indicate your path as you reverse.

Picanto X Line is equipped with even more assists to keep drivers aware of what is happening around them. These include Blind Spot Collision Avoidance Assist (BCA), Lane Keep Assist (LKA), Driver Attention Warning (DAW) and Lane Follow Assist (LFA).

Hill-Start Assist Control (HCA) is another great feature, particularly when exiting from a tight park on a hill. HAC prevents you from rolling backwards by applying the brakes for two seconds, giving you time to lift your foot from the brake pedal to the accelerator and then apply pressure gently.

In the unlikely event of a collision, six airbags distributed throughout the cabin will protect you and your passengers.

Overseas models shown.

Stay connected, stay informed

The Picanto features a large 8.0-inch floating touchscreen as well as Bluetooth multi-connection, letting users pair up two smartphones at the same time - one for hands-free phone and media use, the other for media use only. Apple CarPlay™ and Android Auto™ are both standard, enabling certain phone apps to be shared on the 8.0-inch touchscreen.

Overseas models shown.

A dedicated 4.2-inch LCD instrument cluster is positioned between the main instrument dials. Here you will find vital information about your vehicle, including engine status, trip information and any alerts or warnings.

X Line - Picanto goes to another level

Picanto X Line gives you the extra ground clearance, clearer view of the road and all-round confidence associated with SUV's. It also softens the ride slightly, ideal for city driving.

Picanto X Line features assertive styling at the front, including a unique bumper configuration. It features premium touches like the LED daytime running lights and projection fog lights. There are also LED side indicators, incorporated in the body colour outside mirrors.

The X Line has its own highlights, a chunky black molding that extends from the front bumper to the rear wheel arch surround, while a black molding also adorns the front and rear doors. The detailing finishes with a silver rear skid plate.

Inside you will find a similarly elevated level of specification, with aluminium foot pedals, which only add to the sense of solidity and robustness.

ECO-CONSCIOUS

SO YOU VALUE SUSTAINABLE LIVING? WE DO TOO.

That's why we take pride in rising to meet the expectations and challenges of the 21st century while making tangible contributions to the preservation of the environment and sustainable development of society.

Our environmental research centre spearheads our drive for the production of clean hybrid and fuel-cell vehicles to lead the way to eco-friendly cars for a greener tomorrow for you, your children and all of us.

From design through to recycling, we create innovative products, adhering to state-of-the-art Design for Recycling (DfR) guidelines. Even at the end of your car's life, we aim for eco-friendly return and treatment.

Operating a rigid process, we guarantee environmental protection in the treatment of harmful waste substances. These are then recycled or recovered, ensuring the highest level of environment protection.

As you can see, what you do on a small scale with your household refuse, we at Kia do on a large scale.

Factory Warranty QUALITY REDEFINED

All new Kia Passenger Vehicles come with an impressive 5-Year/150,000 km (whichever comes first) Warranty Programme covering against manufacturing or assembly defects. This warranty programme is transferable between owners and emphasises our commitment to our customers.

5 YEAR Roadside Assist

A Roadside Assistance Programme for the duration of the Warranty Period is also offered on every new Kia at no cost. In the unlikely event that your Kia has broken down, help is only a call away and trained staff will be despatched to your location. If a repair cannot be conducted on the spot, the vehicle will be towed free of charge to the nearest Kia dealer.

INCIDENT CARE

If you and your new Kia were unfortunately involved in an incident or crash that requires body repairs to your Kia, Kia Incident Care is here to help you, and is free for the first five years.
